

Number of DMRs by Threshold Stringency

More stringent thresholds reduce DMR count

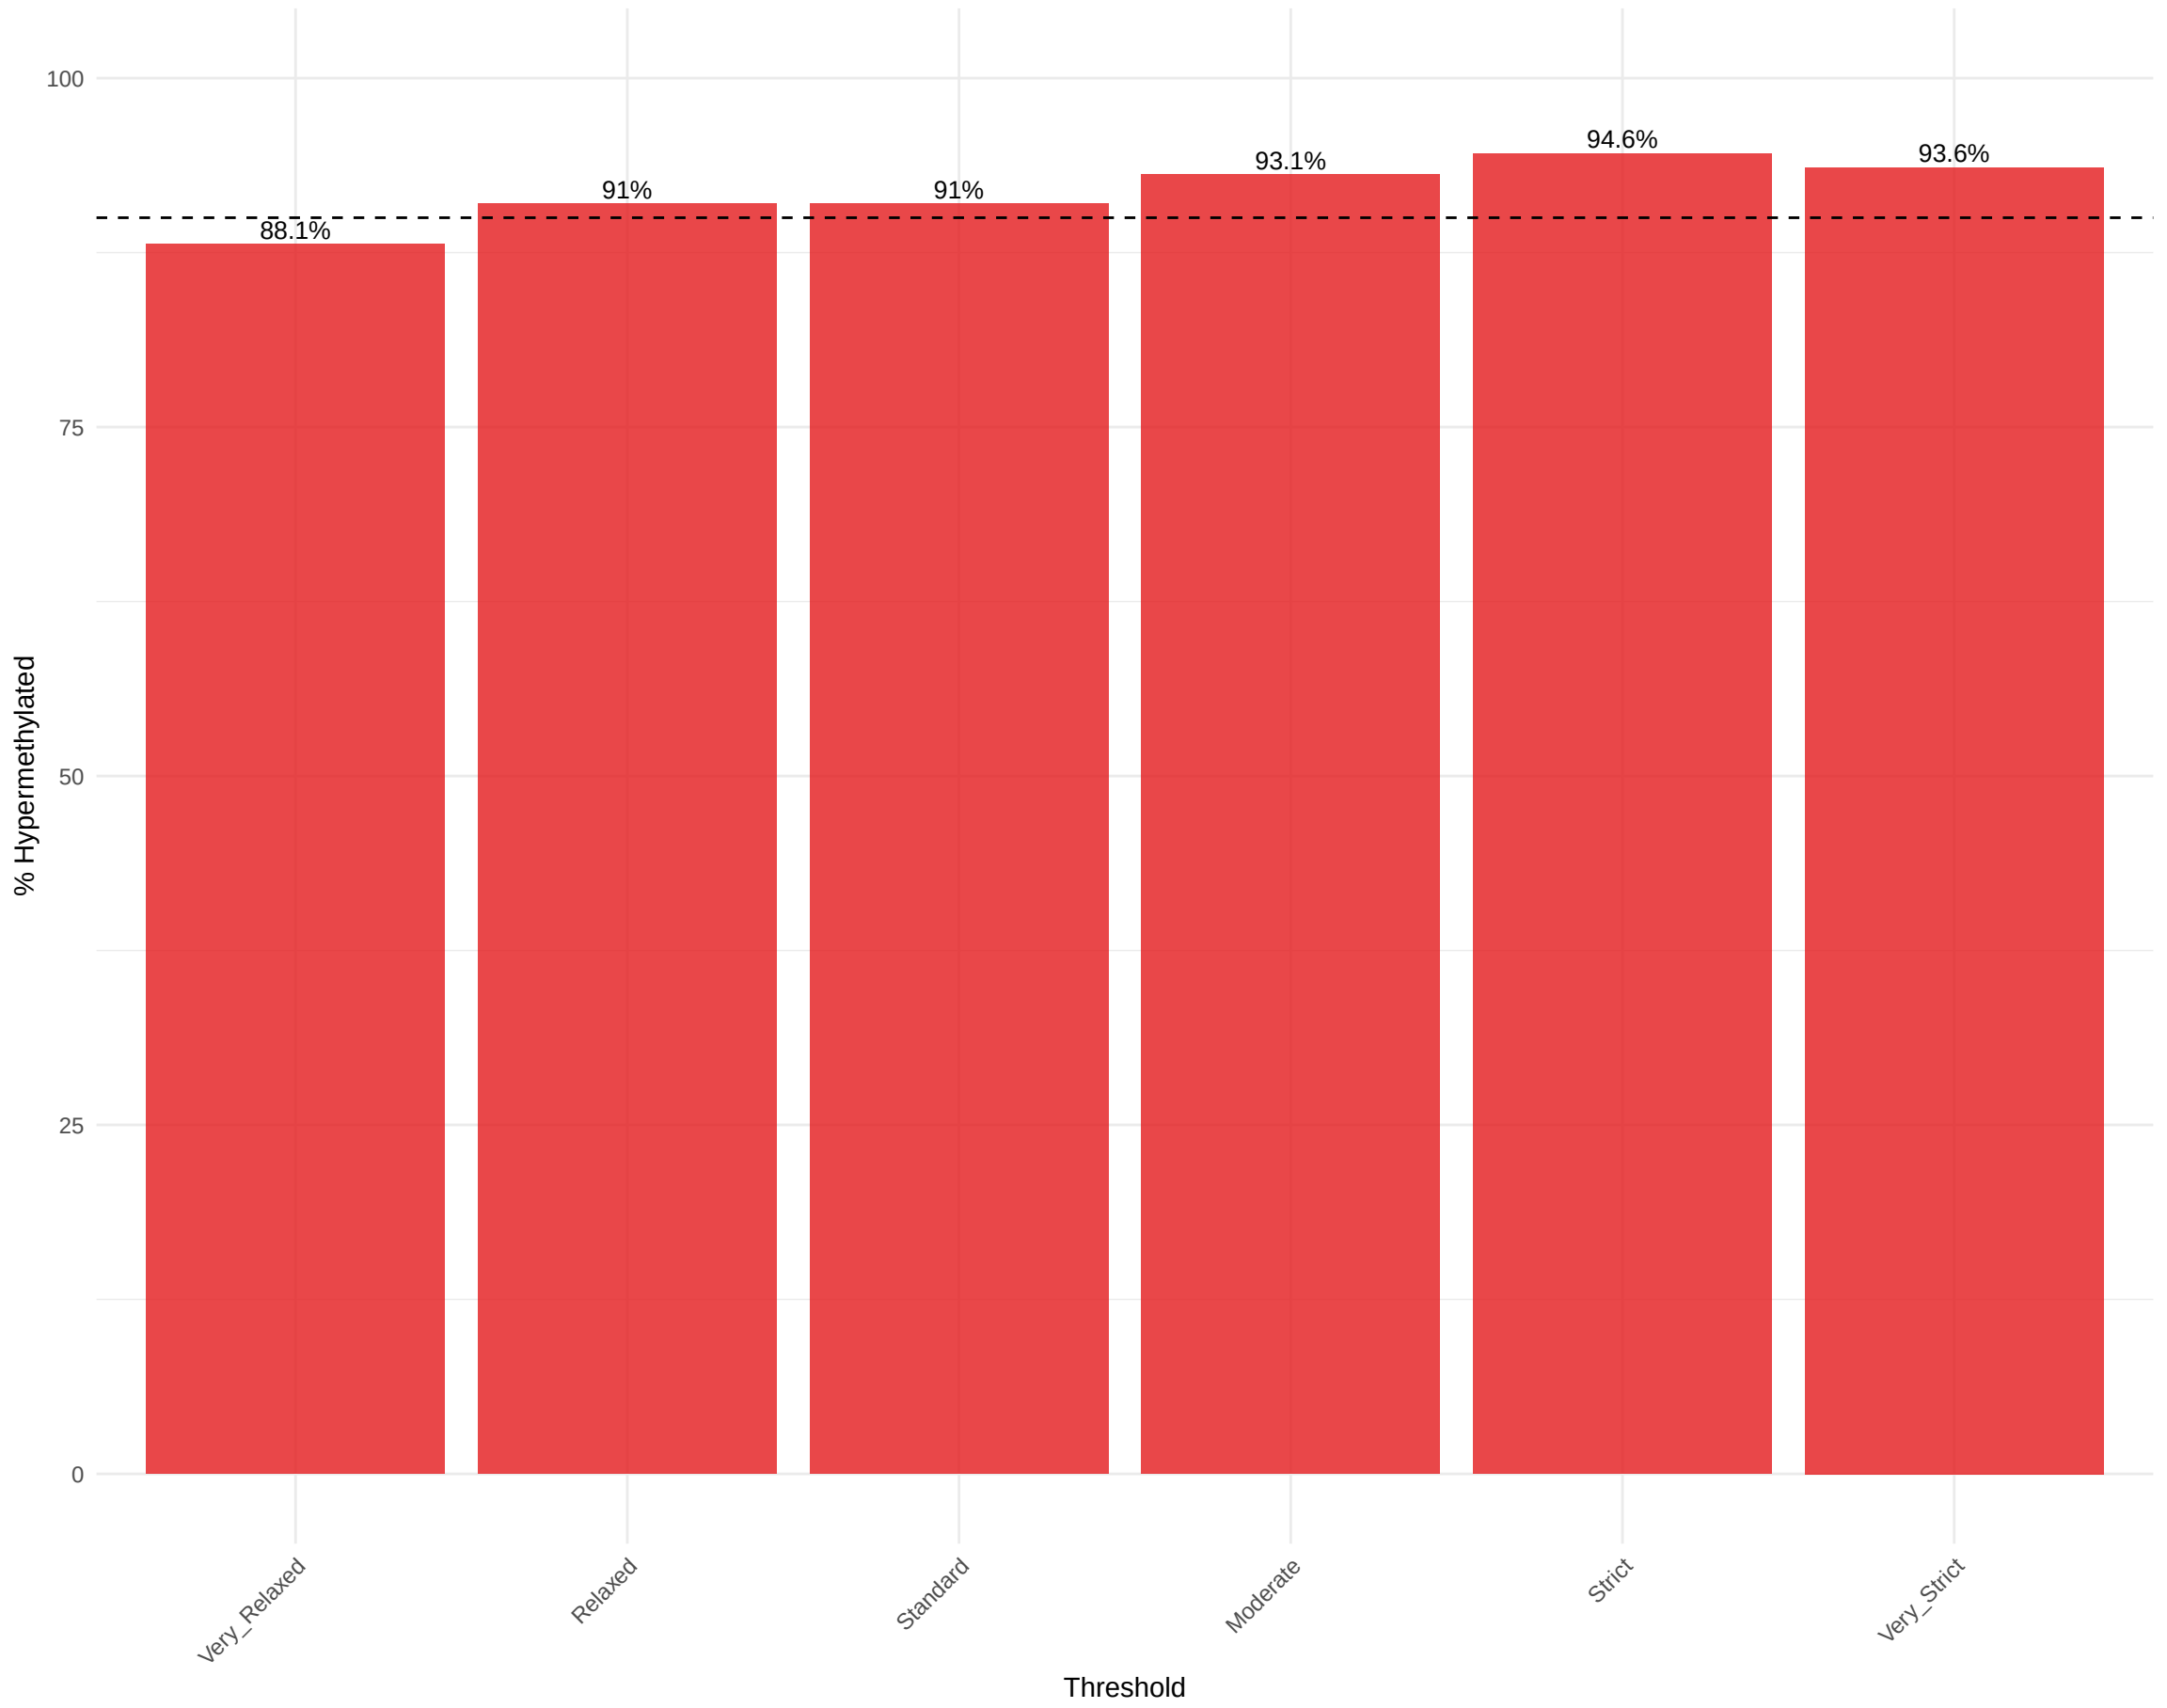

DMR Direction by Threshold Stringency

Hypermethylation dominance is consistent across all thresholds

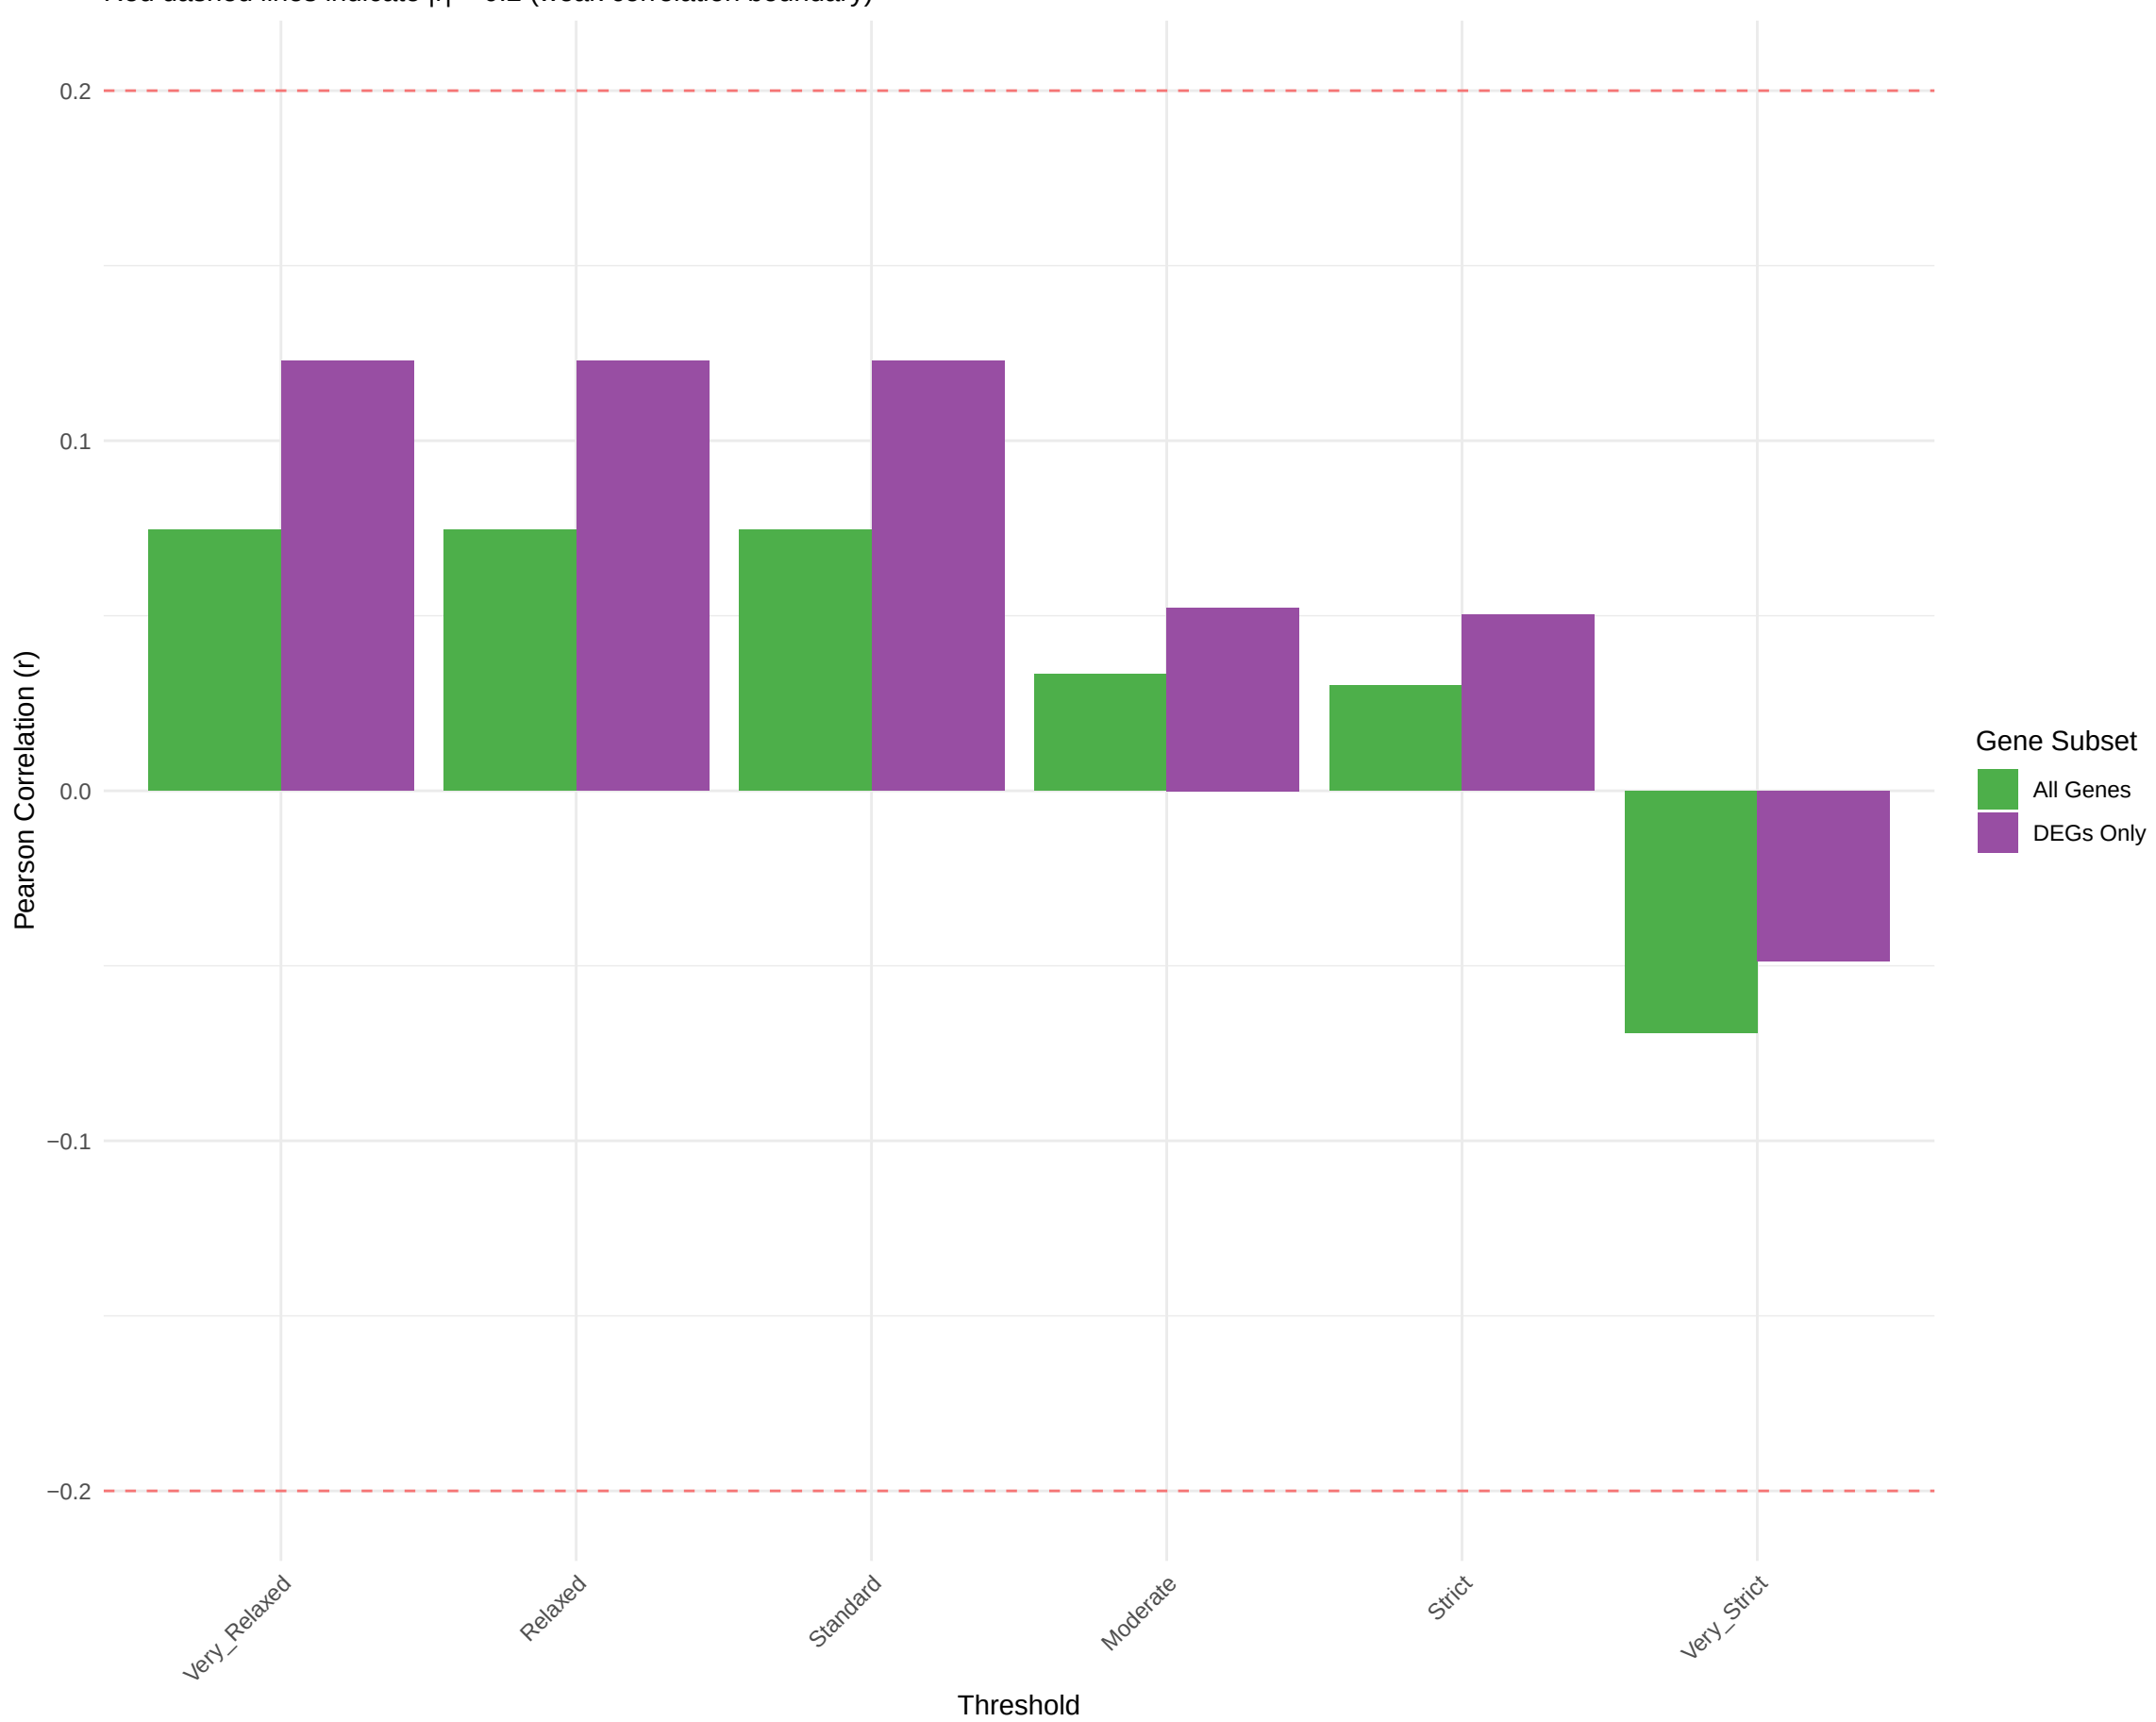

Percentage Hypermethylated by Threshold
Consistently >90% hypermethylated regardless of threshold

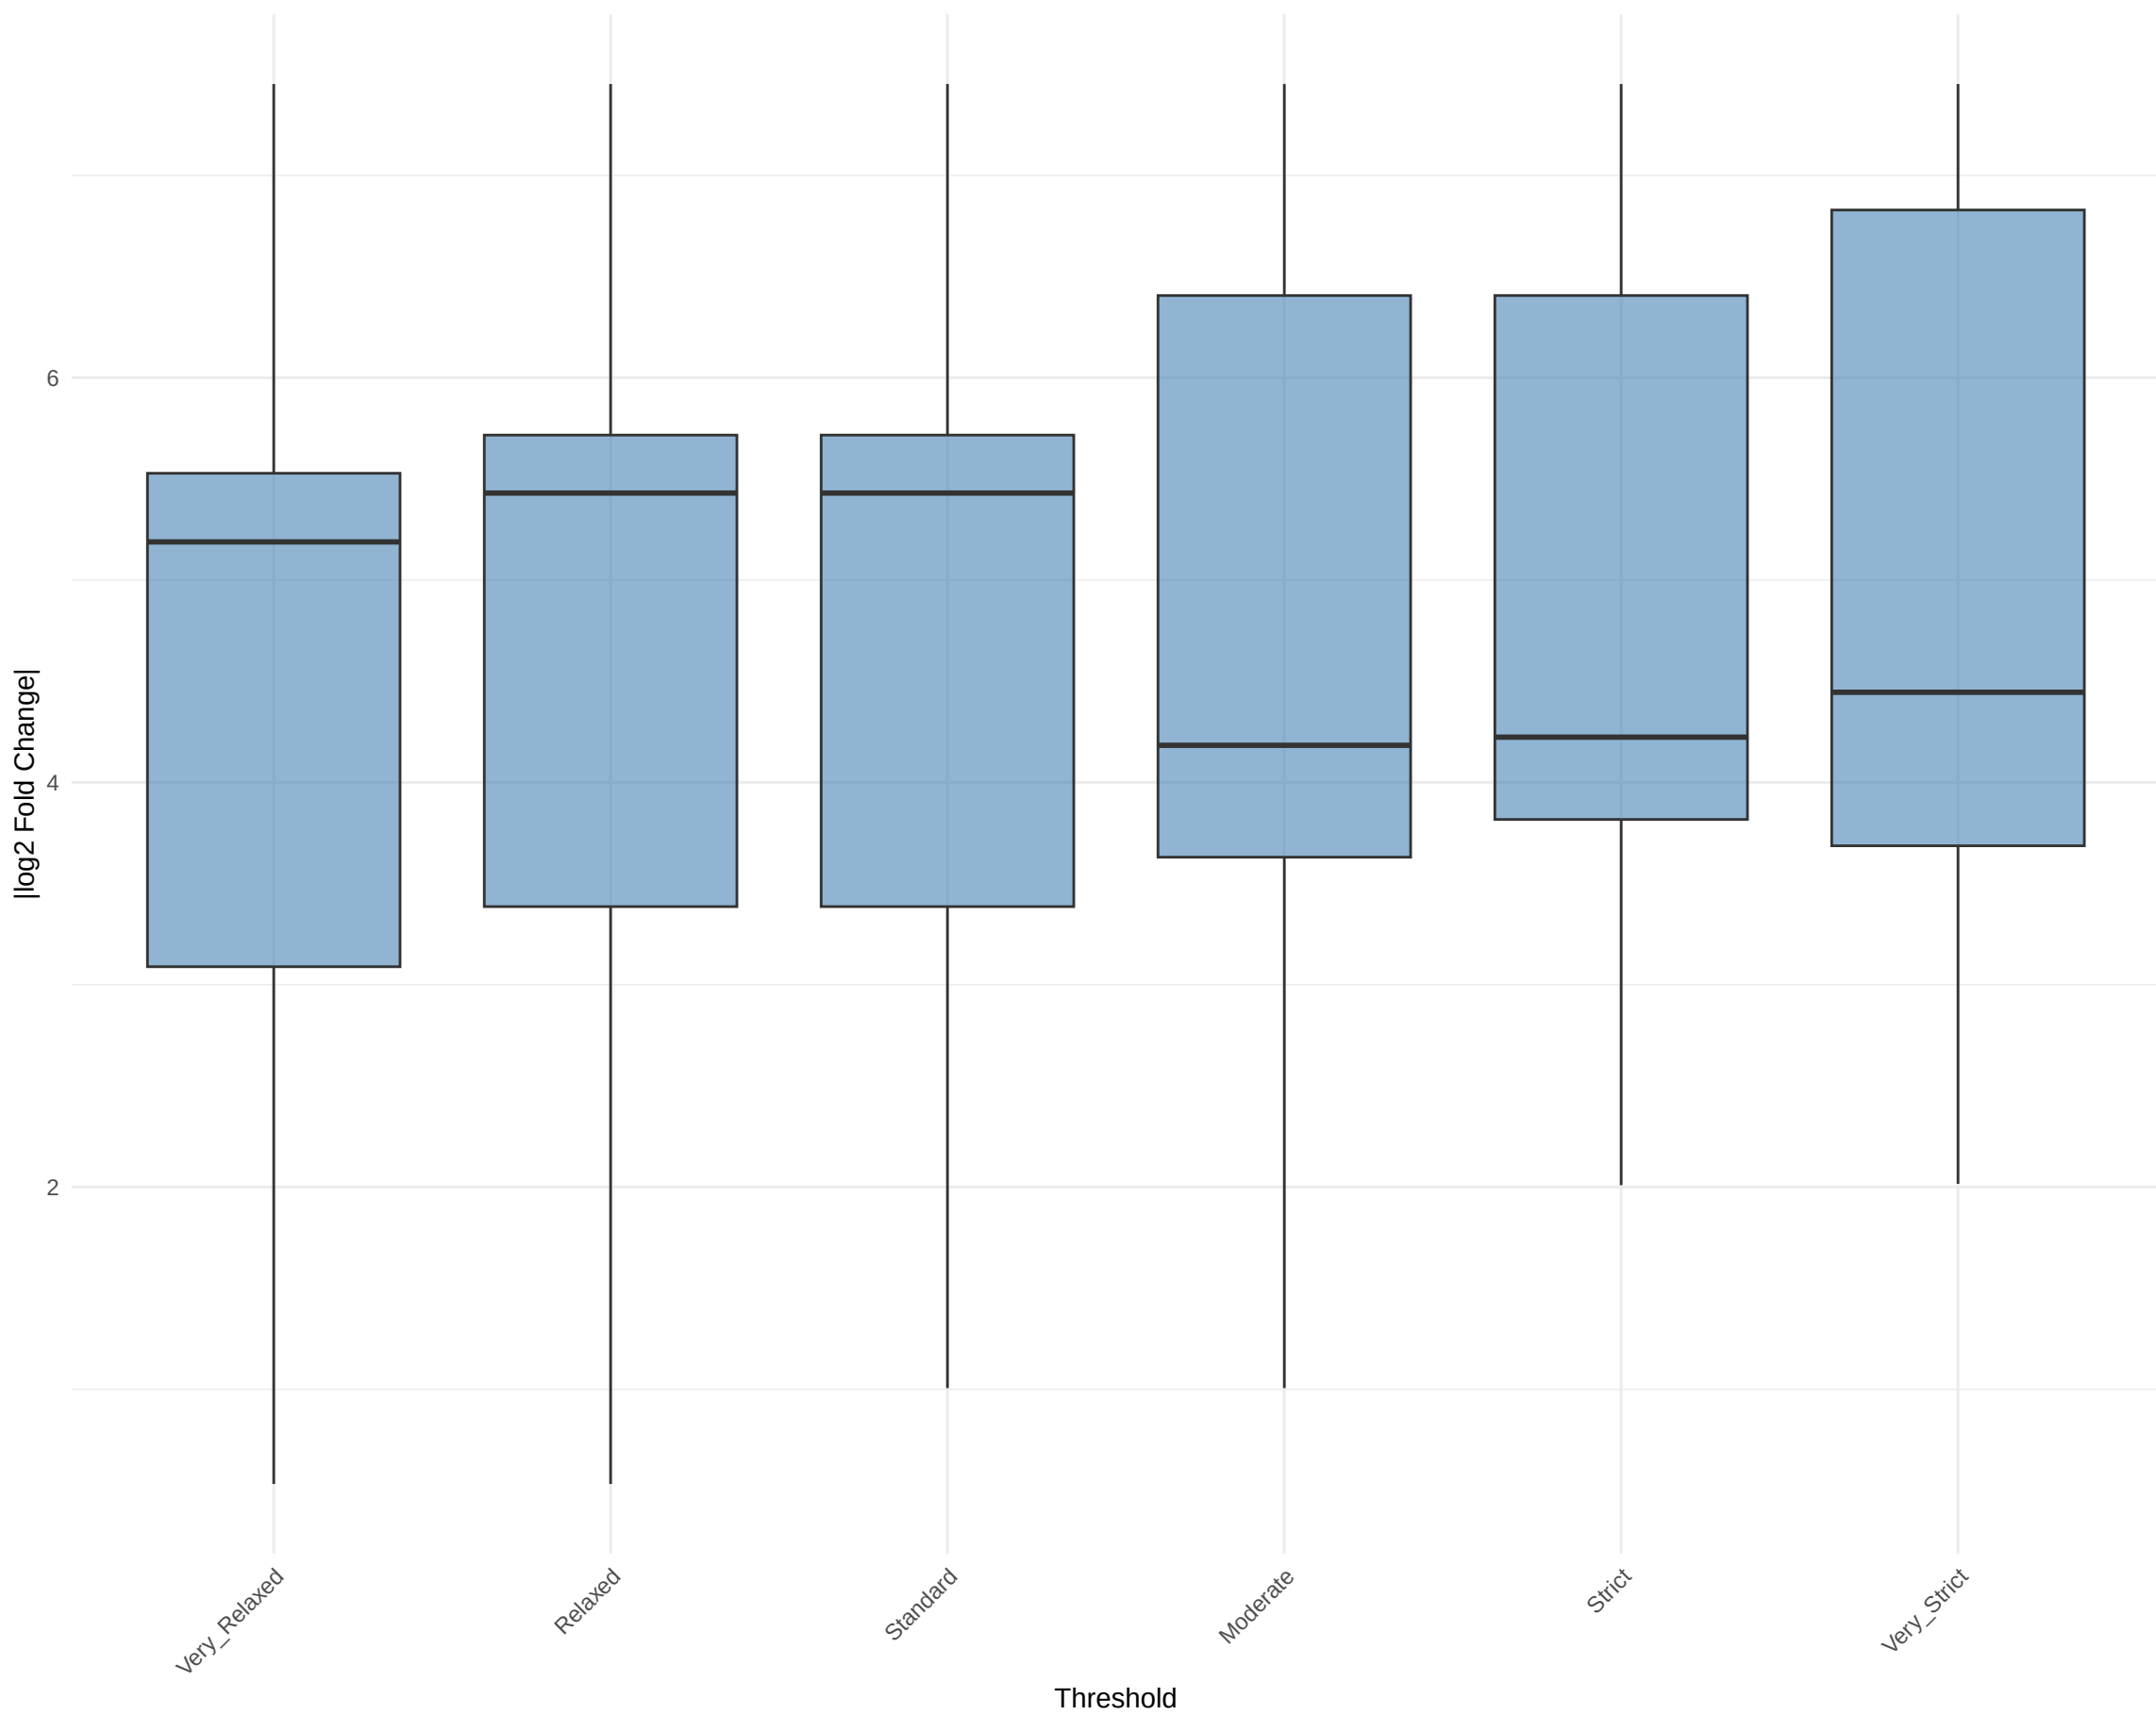

Methylation-Expression Correlation by Threshold

Red dashed lines indicate $|r| = 0.2$ (weak correlation boundary)

Effect Size Distribution by Threshold
Stricter thresholds select for larger effect sizes

Distribution of DMR Cluster Sizes

Mean cluster size: 1.1 DMRs
